

Shaftsbury

A Ballet inspired beauty, the Shaftsbury performs its own show with its grace and elegance. The Shaftsbury cast iron radiator is a stunning example of ornate design and intricate detail. The swirls and waves of etched beauty make it the ideal cast iron radiator for an antiqued, hand-painted or polished finish. The Shaftsbury originates from a London Ballet School, in the Victorian era, which gives rise to its delightful decadence. Distinctive and beautiful, the Shaftsbury cast iron radiator is the perfect choice for a traditional setting.

New York, Lincolnshire LN4 4XH

Maximum test pressure = 3.3 bar | Maximum working pressure = 2.5 bar

Dt50 figures shown in accordance with BS EN442. We have, from experience, found that the Dt60 figures usually give adequate output without oversizing the radiators on standard heating systems. Maximum test pressure = 3.3 bar | Maximum working pressure = 2.5 bar. Lengths quoted are given in good faith. However, due to the nature of the manufacturing process tolerances can and should be expected. Quoted dimensions should therefore only be used as a guideline. Longer lengths are available on request.
