

Victoriana

When history should repeat itself, meet the Victoriana – a 19th-century masterpiece. The Victoriana design reins from America in the 1880's. Beautifully simplistic, the Victoriana design could be found in buildings during the late Victorian era. This simple, yet elegant style has been judiciously recreated by Paladin to offer an authentic, traditional cast iron radiator to suit both modern and period homes.

Paladin Radiators, Langrick Road,
New York, Lincolnshire LN4 4XH

Maximum test pressure = 3.3 bar | Maximum working pressure = 2.5 bar

Dt50 figures shown in accordance with BS EN442. We have, from experience, found that the Dt60 figures usually give adequate output without oversizing the radiators on standard heating systems. Maximum test pressure = 3.3 bar | Maximum working pressure = 2.5 bar. Lengths quoted are given in good faith. However, due to the nature of the manufacturing process tolerances can and should be expected. Quoted dimensions should therefore only be used as a guideline. Longer lengths are available on request.
